HTML, CSS, JavaScript, React.js, Tailwind CSS, BootStrap, Vite, Python, Flask, FastAPI, REST APIs, MySQL, PostgreSQL, MongoDB, SQLite, SQLAlchemy, Nginx, AWS, Linode, DigitalOcean, DNS Management, SSL Configuration, Hostinger, BlueHost, GoDaddy, Git, GitHub, Linux, Postman, Figma, Canva, N8N, Numpy, Pandas, Matplotlib, Seaborn, scikit-learn, LangChain, LLMs

Work Experience

Web & AI Developer Intern
Skillnuts | Pune, Maharashtra

Aug 2025 - Present

- Designed and developed multiple production-level websites including Skillnuts, Sumedha Holdings, and PunePlus, ensuring responsive UI and optimized performance.
- Built the complete Skillnuts platform with AI-powered chatbot and voice assistant for automated user interaction and support.
- Developed a Project Management System with Role-Based Access Control (RBAC) and internal real-time chat functionality.
- Implemented WhatsApp automation workflows using n8n for real-time status updates and communication.
- Managed end-to-end deployment including server setup (Linode), Nginx configuration, DNS routing, and SSL certificate management.
- Handled domain management and hosting across platforms like GoDaddy, BlueHost and other providers for live production environments.

Education

Bachelor of Computer Application | CGPA - 7.70
Tilak Maharashtra Vidyapeeth

2022 - 2025

Higher Secondary | Percent - 71.83
Vishwakarma Institute of Information Technology - VIIT

2021 - 2022

Certifications and Training

AI Certification

Project Experience

VisionChat App - AI Powered Real-Time Communication System

Applied AR filters and capture images to store in personalized gallery. Use hand gestures to play games, draw in the air, or control system volume. Engage in real-time chatting with other users. Monitor emotions or measure face distance from the camera.

Skillnuts Website

Designed and developed the complete website integrated with an AI-powered text and voice chatbot for automated user support. Built a comprehensive Project Management System featuring Role-Based Access Control (RBAC) and Internal chat. Built WhatsApp automation system using n8n for real-time status updates and communication. Managed server deployment, DNS routing, and SSL configuration using Nginx and Linode.

Sumedha Holdings Website

Developed the complete website fully responsive and highly optimized corporate website to establish a strong digital presence. Implemented modern UI/UX principles using frontend stack to ensure seamless user navigation across all devices. Handled domain setup, hosting, and deployment on production server.

PunePlus Website

Developed responsive frontend with fast loading performance. Deployed and managed the application on Linode servers utilizing Nginx for optimal performance. Handled full DNS propagation and domain routing management. Configured and maintained secure SSL certificates to ensure safe, encrypted user access.

Jarvis – AI Voice Assistant

Executed local system commands to seamlessly open or close applications via voice control. Perform automated web searches and answer complex user queries using Groq and Cohere models. Generate dynamic AI images, read daily news summaries, and play YouTube videos entirely hands-free.
